

### Better Plants Program

The U.S. Department of Energy's (DOE's) Better Buildings, Better Plants Program is a voluntary partnership initiative to drive significant energy efficiency improvement across energy intensive industrial companies and organizations. 233 leading manufacturers and public water and wastewater treatment utilities are partnering with DOE through Better Plants to improve competitiveness, drive energy efficiency, and save money.

### Partner Benefits

Manufacturers and public water utilities in the Better Plants Program set energy saving goals, usually 25% over 10 years. They receive:

- ▶ **National Recognition** to highlight their leadership including a feature on the Department's website and invitations to special events. Partner success stories are also highlighted in DOE newsletters and other publications.
- ▶ **Technical Support** through a dedicated Technical Account Manager (TAM) who helps partners establish energy baselines, develop energy management plans, identify energy-saving and energy-recovery opportunities, and track energy performance metrics. TAMs also guide partners in the use of DOE's energy performance tools and connect them to additional resources at the federal, state, or local level.
- ▶ **In-Plant Trainings** are unique 2- to 4-day events, led by experts in energy intensive processes who train plant staff to establish energy management systems, conduct plant assessments, analyze pump and aeration processes, use DOE tools, and implement cost-effective projects. Better Plants Partners can apply to host or participate in these special training events.
- ▶ **Energy Saving Resources** are available to Better Plants Partners on a facilitated basis. These resources include free energy audits for qualifying facilities, free combined heat and power (CHP) screenings, energy analysis software tools, and peer-to-peer networking opportunities.
- ▶ **Additional Opportunities** are open to partners to deepen and expand their commitment to energy efficiency. Partners can take advantage of Technology Days at National Laboratories to learn about and leverage advanced R&D or access a variety of energy measurement tools through the Diagnostic Equipment Program. Forty-three organizations (underlined on page 2) have also stepped up to the Better Plants Challenge, and are demonstrating enhanced transparency around their energy performance data and best practices. Additionally, DOE is working with a select group of partners on separate initiatives targeting supply chain energy efficiency and water savings.

### Better Plants Snapshot

Accomplishments	Total
Number of Partner Companies	233
Approximate Number of Plants	3,200
Percent of U.S. Manufacturing Energy Footprint	12%
Reported Savings through 2018	
Cumulative Energy Savings (QBtu)	1.3
Cumulative Cost Savings (Billions)	\$6.7
Average Annual Energy Intensity Improvement Rate	2.6%

### How to Join the Program

Joining the Better Plants Program is easy. Contact the Better Plants team via e-mail at [BetterPlants@ee.doe.gov](mailto:BetterPlants@ee.doe.gov) to receive the voluntary commitment form. Return the form, signed by your CEO or senior executive. From there, DOE will organize a call with your company to kick off the partnership.
